## BLIND EMOSS

## UV VARNISH

## Finishing Options

### Matt Laminate / Gloss Laminate (Celloglaze or Cellosheen)

Also known as celloglazing. Matt is a smooth, satin like finish applied to the top of the card. The Gloss gives a photo like finish.

### Smooth

This finish is just the smooth semi-gloss artboard. It's a smooth coated board that can be written on with pen.

### UV Varnish

A gloss clear coating that gives a raised feel to the card. Screen Printed over the printed card in any design over Matt Laminated cards to enhance the appearance.

### Blind Emboss

A metal plate is made and then pressed against the card (high pressure) to make an indent in the shape of your artwork. The embossing does not register with type or logos.

### Raised Print

Also known as 'Verko' or 'Thermography' a additive is mixed with the ink, then heated to give a raised '3D' look to the logo or type on the card.

### Die Cut

Just supply the outline of the shape you want your business cards cut to and we'll die cut (also known as Forme cutting) your cards to shape.

### Round Corners

Make your card look just that little bit different by adding a round corner to one or all corners.

### Tent Cards

Would you love some extra room on your business card, or perhaps just a card that stands up for itself. The Tent card is the answer. Just double the prices on the other side of this price list. We will supply them flat with a score for easy folding.

### Special Paper Stock

If you have a special paper stock that you would like your jobs printed on - no problem. We can source papers from a variety of Australian paper merchants for your job. Please email us with the specification of your job, quantity and the stock that you require for a quotation.
